

Announcing a Speech and ABA Partnership!

We are so pleased to announce that Pam Manser & Associates will be partnering with Connec-to-Talk, LLC, a premier ABA Therapy Provider! Beginning mid-July, qualifying children will be eligible to receive ABA Therapy at the Pam Manser & Associates Clinic in Mooresville, NC! This partnership will offer families a holistic, collaborative approach for their children's therapies all at one convenient location!

Connec-to-Talk specializes in Early Intervention ABA Services for children up to the age of 6 with an autism diagnosis. Connec-to-Talk is unique in the field of ABA due to their play-based service model philosophy and has successfully helped children thrive for over 20 years. Connec-to-Talk's model is focused on preparing young children with the skills they need for a successful transition into school. While a tremendous amount of work goes into building those foundational skills, we believe that children learn most effectively through play.

Benefits of Early Intervention ABA

- ✓ Early intervention can help teach pre-academic skills like color & number identification, attending to instructions, tolerating transitions, and completing tasks independently.
- ✓ We empower children to self-advocate and create meaningful relationships with staff and peers.
- ✓ Early ABA can help teach functional communication skills which reduces the chance of your child developing challenging behaviors.
- ✓ When starting ABA services at an early age, the gaps between your child and their peers will be much smaller and more quickly closed.

Connec-to-Talk is now accepting new clients for a mid-July start date!
